# Onboarding and Offboarding Policy

Pannon Office Services Ltd. | Internal policy

| | | | |
|---|---|---|---|
| **Document ID** | HR-POL-01 | **Version** | 1.0 |
| **Owner** | HR Manager, Réka Varga | **Approved by** | Managing Director, Marta Székely |
| **Approval date** | 25 August 2026 | **Effective date** | 1 September 2026 |
| **Review date** | 1 September 2027 | **Applies to** | Pannon Office Services Ltd. |

## Purpose and scope

This policy coordinates employee start, transfer, and departure events between HR, line managers, and IT Operations. It applies to Pannon Office Services employees. Contractors and external support personnel follow their named engagement owner and the applicable access request process.

## Responsibilities

| Role | Responsibility |
|---|---|
| **HR Manager / HR team** | Maintains the authoritative employment event and status record; opens or triggers the linked ServiceNow request when an event is confirmed. |
| **Line manager** | Confirms role, system needs, transfer timing, and access approvals before IT provisions or changes access. |
| **IT Operations** | Fulfils approved access changes, disables access at departure, records timestamps, and escalates deadline misses. |
| **ISMS Manager** | Receives same-day escalation for a missed offboarding deadline and tracks corrective follow-up where needed. |

## Onboarding and transfer requirements

| Ref. | Requirement |
|---|---|
| **HR-01** | When a hire is confirmed, HR records the employee ID, name, manager, department, role, and start date. HR or the manager submits a ServiceNow IAM request with the access profile and effective date. The manager approves before provisioning; approval remains required for short-notice hires. |
| **HR-02** | IT provisions only the approved role access, no earlier than needed for work and normally before the employee’s first working day. The ticket records the account ID, systems or groups granted, fulfiller, and completion time. |
| **HR-03** | The manager and HR confirm a transfer date and new role. The manager approves changed access before the effective transfer. IT removes access no longer required for the former role by the effective transfer time and records the additions and removals in the same ticket. |
| **HR-04** | The manager ensures that a new hire or transferring employee completes the security induction within 30 calendar days of the start or transfer date. HR records the completion date. |

## Offboarding requirements

| Ref. | Requirement |
|---|---|
| **HR-05** | As soon as a separation date is confirmed, HR opens a ServiceNow offboarding ticket and includes the employee ID, recorded employment end date and time, manager, and systems known to be assigned. If notice is received after the end time, HR opens the ticket immediately and records the actual notice time. |
| **HR-06** | IT disables the employee's central sign-in and assigned application accounts no later than four hours after the recorded employment end time. The four-hour clock starts at the recorded end time, not when the ticket is received. |
| **HR-07** | A mailbox may be delegated to a named successor after the employee's sign-in is disabled. A mailbox ownership question does not delay account disablement. Record each disabled account and timestamp in ServiceNow. |
| **HR-08** | If the four-hour deadline is missed, IT Operations escalates the event to the IT Operations Lead and ISMS Manager on the same day, records the reason and containment, and keeps the ticket open until access removal is evidenced. |

## Records and exceptions

HR retains the employee event record and training date. ServiceNow retains linked joiner, mover, and leaver requests, approval history, fulfilment actions, account IDs, and timestamps. No exception may extend the four-hour offboarding deadline. Local company time is used for all timestamps; business-day calculations for any related escalation use Monday to Friday.
